

GREENE COUNTY PARAMEDICS

2025 YEAR IN REVIEW

2025

4,125 DISPATCHED CALLS IN 2025.

Greene County Paramedics is the county's advanced life support fly car service. The local ambulance responds to every call. A paramedic responds in a fly car with the cardiac monitor, ventilator, and medications, and rides with the patient to the hospital when needed.

4,125
Calls dispatched
Includes standbys for fire scenes, police activity, and out-of-county mutual aid.

3,324
Patients evaluated
Assessed and treated by a paramedic at the scene.

2,189
Rode to the hospital
Patients a paramedic rode with in the ambulance.

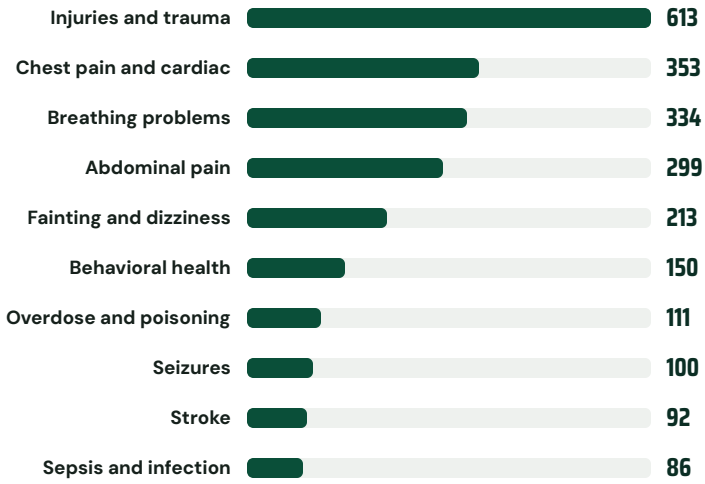

33
Cardiac arrests worked
16 patients had a pulse back before reaching the hospital.

From the Chief. In 2025 our six paramedic units were dispatched to 4,125 calls, rode to the hospital with 2,189 patients, and averaged under nine minutes from dispatch to on scene in both the valley and the mountaintop. Not every patient we evaluate rides with a paramedic. Some are treated and released at the scene, some decline transport, and some are stable enough to go with the ambulance crew.

2025 **REMO ALS Provider of the Year.** Awarded by the Regional Emergency Medical Organization to our Friday day shift crew, whose members have 130 years of combined service in EMS.

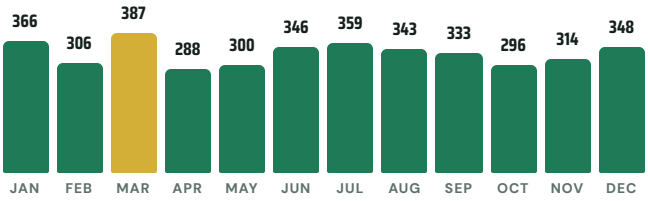

CALL TYPES

WHAT WE WERE CALLED FOR

BY MONTH

CALLS BY MONTH

8:42
Average response, valley
Dispatch to on scene

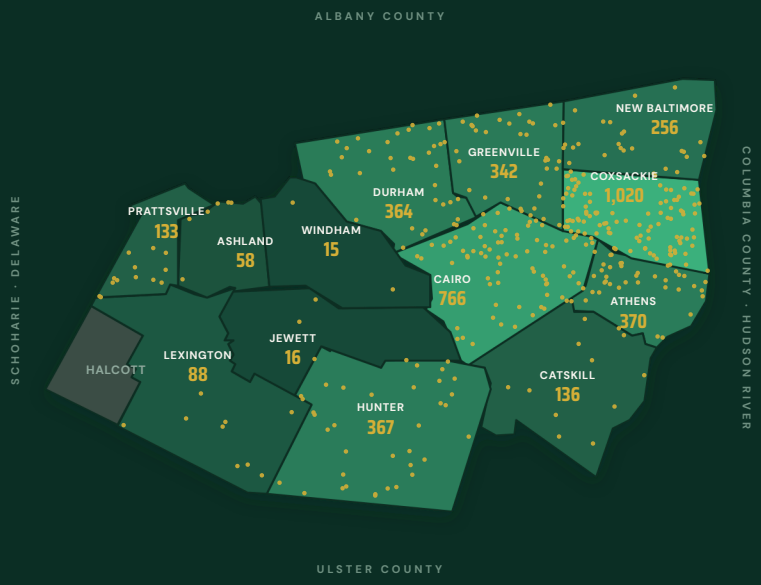

8:47
Average response, mountaintop
Dispatch to on scene

9
Patients a day
Average, 2025

31
Helicopter flights

WHERE

CALLS BY TOWN

Each dot is ten calls, placed at random inside the town. Lighter towns had more calls. Windham and Catskill are mutual aid only.

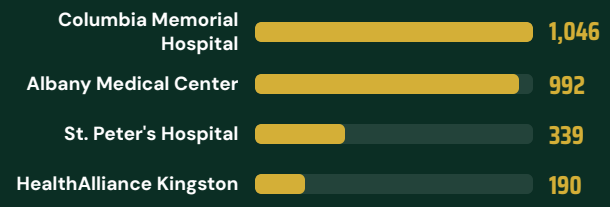

TOTALS

BY THE LOCATION OF THE CALL

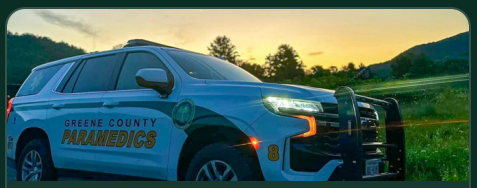

Coxsackie	1,020	Catskill	136
Cairo	766	Prattsville	133
Athens	370	Lexington	88
Hunter	367	Ashland	58
Durham	364	Jewett	16
Greenville	342	Windham	15
New Baltimore	256	Outside Greene County	36

DESTINATIONS

WHERE PATIENTS WENT

The nearest hospital is across the river in Hudson. The nearest trauma center and cath lab could be up to 80 minutes away in Albany.

CARDIAC

1,913
12-lead ECGs

78	STEMI and cardiac alerts
33	Cardiac arrests worked
16	Pulses restored
13	Shocks and pacing

AIRWAY AND BREATHING

69
Patients on a ventilator

34	Intubated
39	On BiPAP or CPAP
27	Endotracheal intubations (video)
9	Rapid sequence intubations

STROKE, SEPSIS, TRAUMA

112
Stroke alerts

26	Sepsis notifications
29	Trauma alerts
37	Overdose reversals
1,806	IV and IO lines started

"Tiered response models consisting of BLS transporting units and ALS non transporting EMS vehicles may greatly increase response capabilities and create more resilient response systems by preserving ALS level care for when it is needed."

New York State Report on Rural Ambulance Services, March 2026, page 24

The New York State Rural Ambulance Services Task Force made 38 proposals to the Legislature in March 2026. Proposal 8 is tiered response with paramedic fly cars statewide. Greene County has operated this model since 2000.

To the ambulance services of Greene County, the fire departments, Greene County 911, the emergency departments at Columbia Memorial, Albany Med, St. Peter's and Kingston, our Board of Directors, the town boards, and the Greene County Legislature: thank you.
